Get started

Get started with Workers. How would you like to begin?

Workers   **Pages**

⌥ **Import an existing Git repository** Start by importing an existing Git repository.	Get started
☁ **Use direct upload** Upload your site's assets including HTML, CSS, and JS files directly from your computer.	Get started

Deploy a site from your account

Select a repository to connect as your project's source code. New commits will trigger Cloudflare to automatically build and deploy your changes.

 GitHub   GitLab

 GitHub account

 Webengineering-GELI-T ▾

⊕ Add account

Select a repository

Webengineering-GELI-TRSI.github.io

If your repository is not shown, configure repository access for the Cloudflare Pages app on GitHub.

Success! Your project is deployed to Region: Earth

You can preview your project at webengineering-geli-trsi-github-io.pages.dev ⌃
